

IT Project Manager

Telecommunication Sector

#poweredbyyou

KPMG Advisory Ltd.

KPMG IT consulting services cover a broad range of activities, like supporting the selection and adaptation of new and disruptive technologies, the development and implementation of our clients' IT strategy along with the transformation of IT operations, the detection of cost-cutting opportunities and the selection of suppliers. Our project consultants assist clients in developing the right portfolio management methodology, managing projects and performing quality assurance, thus ensuring the timely delivery of projects to the desired standard and within budget.

We apply international methodologies and KPMG's own frameworks, but we believe that every advisory problem is unique and requires a unique solution. Accordingly, the majority of our team is made up of highly skilled senior experts.

As part of our team, we will count on you...

- participate as a program manager / project manager in Telecom sector on large scale implementation projects,
- plan and manage end-to-end delivery of project(s) at different Customers,
- take responsibility for the overall success of the project and advising key stakeholders and project board of any deviations that impact the plan,
- liaise with Customer's Program Management Office to ensure the management of key dependencies,
- maintain a high level of governance throughout, ensuring the requested tools and information sharing are kept up to date – RAID Logs, project systems, weekly project reporting, financial tracking, dependencies, and plans,
- prepare project reports and chair regular meetings with governance bodies including key stakeholders.

This is a perfect opportunity for you, if you have...

- university or college degree,
- strong interest in IT (is a must),
- 5-8 years' IT Project Management experience, and at least 3 years in the Telecom sector,
- effective leadership and communications skills, projecting competence and credibility,
- experience with working in a changing environment involving new IT systems, new processes,
- understanding of IT system implementation related processes (including design, implementation, integration, testing and change management processes),
- knowledge about the key business processes and key IT architecture in the Telecom sector,
- experience with running complex projects in a Telecom organization where time to market and cost are critical success factors,

- ability and willingness to learn and deliver in a challenging environment,
- strong analytical and presentation skills,
- strong English skills and Hungarian native language knowledge (is a must),
- project- or Program-management professional accreditation for e.g. - PRINCEII, PMP is an advantage, however not required,
- experience with agile frameworks is an advantage, however not required.

We'll provide you with...

- working with a motivated, highly skilled senior expert and dynamic, helpful junior team,
- working with a wide selection of prestigious clients on exciting assignments,
- professional development opportunities to strengthen or broaden your expertise,
- competitive salary and benefits (including health insurance to all eligible employees and flexible fringe benefit system).

If you are up for the challenge, please apply by uploading your English and/or Hungarian CVs.

Apply easily and experience success together.
